

Notes for Shelter Committee Meeting, 02/18/21 @ 3pm via Google Meets

Committee members present:

Pennie Wardlow

Brittany Berget

Dr. Nicole Vigil

Susan Simons

Stacie Voss

Members of the Veterinary Board include:

Dr. Uhrig

Susan Simons has joined the Shelter Committee as the Public Member

A close to final draft of the S/N Funding Application as well as a FAQ document was discussed.

Added a question about the median income for the organization's county. Added a line clarifying that organizations can work together and complete a single application.

Cleaned up a few pieces of working in the FAQs and application.

Began discussion about the application assessment form as it pertains to the application. Talked about scoring things like intake/save rate, area targeted for project, income sources and low income areas, and finally, coming up with a way to compare number of procedures proposed based on method.

Notes for Shelter Committee Meeting, 01/07/21 @ 3pm via Google Meets

Committee members present:

Pennie Wardlow

Brittany Berget

Dr. Nicole Vigil

Stacie Voss

Members of the Veterinary Board include:

Dr. Garcia

Dr. Uhrig

Public:

Elizabeth Wolf, APNM

The first draft of the application was discussed: Funding parameters were narrowed down slightly. The Committee decided to take the path of not narrowing the scope too much. It is not certain what types of Spay/Neuter projects in the state will need to be funded so the Committee feels that having broader parameters on the application would be beneficial.

The Committee talked about including intake and outcome information for organizations that housed animals. Including average cost of surgery, whether "in-house", via voucher, or through a mobile unit.

Income verification was discussed- how organizations could verify income and including the organization's plan to verify income on the application.

The Committee also discussed what type of funding information would be asked for on the application and organization budgetary information.

Matching funds were discussed, as far as definition, and somehow defining that for the application.

APNM agreed to help with the technical aspect of getting the application into a fillable PDF or similar electronic file.
